WHAT WE BELIEVE IN

Early intervention is important, however speech therapy can be effective at any age.

Creating a close rapport with parents and their children to achieve best results.

Using a holistic approach and accommodating learning styles to suit your child.

Making sessions fun and interactive.

Additional needs; such as: Autism Spectrum Disorder, Developmental Delays, Attention Deficit Hyperactivity Disorder, Down's Syndrome etc.

Call us today on 8544 0500 if you have concerns about your child, we'd love to help!

ADDITIONAL SERVICES

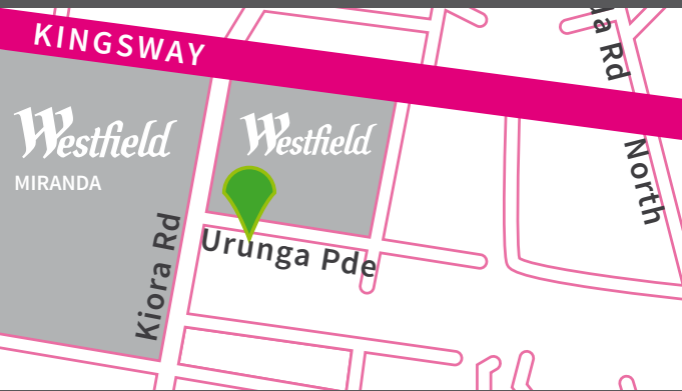

- **Social skills groups:** These groups run over each school term and match children of similar ages and areas of difficulty. The focus of these groups is building each child's confidence and ability to play and interact with their peers.
- **School preparation groups:** These sessions are carried out in a fun group setting. The main aim of these groups is to help prepare each child for the exciting milestone of attending school. We teach early reading and writing skills.
- **Home and school-based assessments and intervention:** When clinic sessions are not available or suitable for a child, we offer these alternative settings.
- **Preschool screenings:** As early identification and intervention are vital, we offer preschools the opportunity to have identified children's speech and language development screened at no cost to determine if there are any concerns that may require a more in-depth assessment.
- **Combined speech and occupational therapy sessions:** Joint sessions are available to help children learn in an optimal environment, by combining a multitude of therapy approaches. This includes addressing sensory, fine and gross motor as well as communication needs.

Providing a fun and experienced service to children and adolescents with social, literacy and communication difficulties.

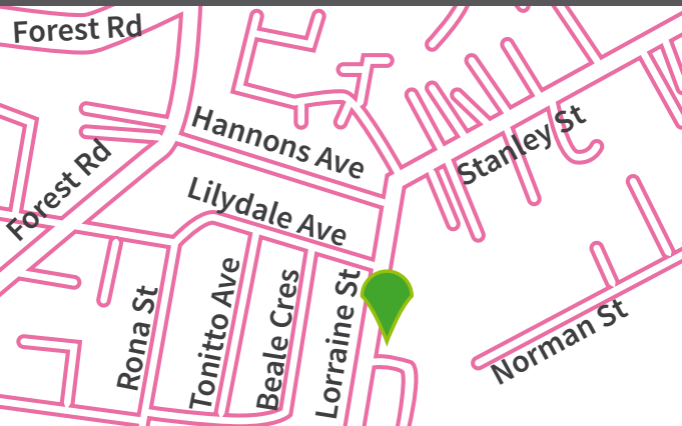

At CommuniKIDS, we pride ourselves in delivering an evidence-based, holistic and family-oriented service. Working collaboratively, we strive to get the best results for our clients.
